

Technical Writer Portfolio

About Me

I am a technical writer cum illustrator with a passion for creating clear and concise technical documentation. With a background in Mechanical engineering, I have honed my skills in translating complex technical concepts into easily understandable content for both hardware and software products.

Throughout my career, I have worked with various teams to develop user manuals, online help systems, and service documentation. My goal is to ensure that users have the information they need to effectively use the products and services I document.

In addition to my writing skills, I have experience in interpersonal communication and emotional intelligence, which allows me to collaborate effectively with developers, SMEs, product managers and work in a multicultural environment. I am always eager to learn new technologies and improve my writing techniques.

Feel free to explore my portfolio to see examples of my work and learn more about my professional journey.

Portfolio Samples

Aerospace Technical Illustration

I started my career with the Aerospace domain to create technical illustration for aircraft manuals like Illustrated Parts Catalog, Aircraft Maintenance Manual, and Structure Repair Manual.

- **Tools used:** Arbortext Editor, TechDraw
- **Project:** AIRBUS
- [A320 Aircraft Manual](#)

Automobile Technical Illustration and Writing

I have worked with the Automobile domain to create technical illustration and writing for manuals like Service Manual, Owner's Manual, and Parts Catalog. In this role, apart from creating technical illustration, I was also involved in writing procedures and instructions for the manuals.

- **Tools used:** Adobe Illustrator
- **Project:** Mercedes Benz, Bharat Benz, Fuso
- [Owners Manual](#)

Technical Writing for Wind Turbine

I have worked with the Wind Turbine domain to create technical writing for service manuals, safety instructions, and troubleshooting guides. In this role, I honed my technical writing skills by creating clear and concise documentation for complex systems.

- **Standard:** ASD-STE100 (Certified)
- **Tools used:** CCMS, MS Word, PTC Windchill
- **Project:** Vestas
- [Service Manual](#)

Technical Writing for QMS and LMS

I have worked with QMS and learning management system domains to create technical writing for quality manuals, technical quizzes, and training materials.

- **Tools used:** MS Word, Articulate Storyline, Walk Me
- **Project:** Vestas PLM tools

Technical Writer (Team Lead) for Sheet Metal CAD CAM Product

I am working as a technical writer (team lead) for a sheet metal CAD CAM product to create technical writing for user manuals, installation guides, and release notes.

- **Tools used:** GitHub, VS Code, AsciiDoc
- **Project:** TRUMPF CAD CAM products for sheet metal manufacturing
